BETEX

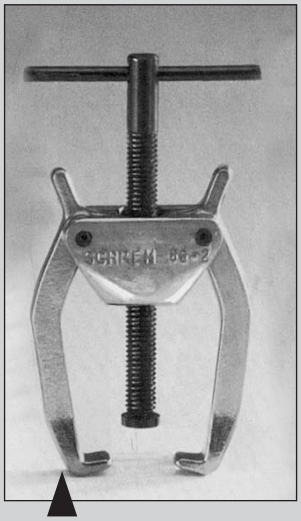
PULLING TOOLS

BETEX no. 47
Patented special 2-arm bearing pullers

This bearing puller is particularly suitable for extracting bearings, bearing-rings etc. that fit flushly with other parts. This system is generally applied when dismantling bearings from anchors, pump shafts etc.

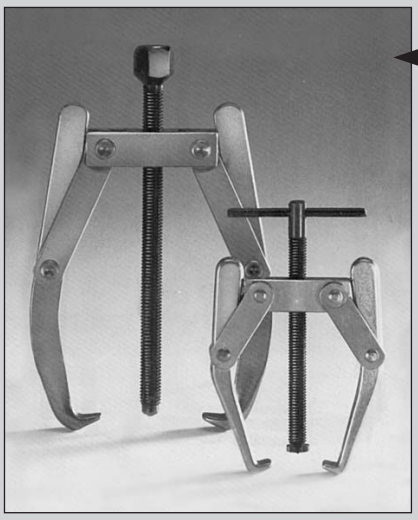
BETEX no. 48/49
2/2 bearing splitters and pullers

Betex no. 48/49 is designed for dismantling flush-fitting bearings and other parts where an ordinary puller would be unable to get a proper grip. Suitable for various applications.



BETEX no. 46-2
This puller is specially suitable for removing fans from electric motors.

The one-hand operation of the puller permits easy use even under unfavourable conditions. A spring inside the housing guarantees a continual clamping of the forged alloy steel arms.



BETEX no. 46-0
Simple, handy two arm puller for parts gripped externally like pulleys, bearings, rings, etc.

During operation the arms cannot slip because they are pressed against the cross bar. The higher the necessary pulling force, the stronger the arms are pressed against the cross bar.

- All pullers are made of high alloy steel.
- The method used in manufacturing the screws enhances their quality and increases their durability.
- Safe and effective to work with.
- These tools are intended for **universal** and **special** applications.

TECHNICAL DATA

BETEX 46-0 is available in 3 types

type	max. diam. mm	max. shaft length mm.
46-000	75	60
46-010	110	100
46-020	220	200

BETEX 46-2 is available in 1 type

type	max. diam. mm	max. shaft length mm.
46-200	60	40

BETEX 47 is available in 2 types

type	max. diam. mm	max. shaft length mm.
47-100	45	65
47-200	90	100

BETEX 48 is available in 5 types
BETEX 49 is available in 4 types

type	max. diam. mm.	counter support	max. shaft length mm.
